Edition 4

West-Trak®

UNRIVALLED STRENGTH

Delivering the solutions you need to stay productive

INDUSTRIES WE SERVE

MINING

We know wear – every hour of downtime means an impact on your productivity & profit. Our mining solutions ensure increased uptime & better performance from your front line machines.

QUARRYING

High wear & tear environments can grind your machines to pieces. Armour up & protect your assets with our tough steel solutions, to get longer service life & reduced downtime.

FORESTRY

When you're miles away in the back blocks tracking, cutting & hauling logs, your machinery has to stay productive. Our range of forestry products & services will help you stick to the slopes & get more done.

CIVIL CONSTRUCTION

When you're hard at work building infrastructure the economy relies on, we'll keep your machines moving with unrivalled parts, service & back-up support you can rely on.

ENGINEERING

Fixing break downs fast & finding the right parts for your maintenance or fabrication projects can be extremely challenging. Our huge range of heavy wear steel products will help you deliver on time, every time.

FAST FACTS

30+ Years

Industry Experience

Nationwide

Sales, Service & Support

1500+ Tonnes

Of Undercarriage Parts

500+ Tonnes

Of Ground Engaging Tools

Parts

For over 5000 Machines

Global Support

From our parent company Astrak Global

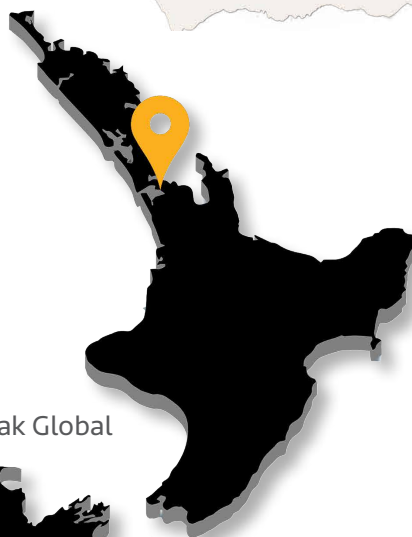

500+ Tonnes

Of Steel Plate & Profiles

50,000+

Plans & Drawings

DISTRIBUTION

We deliver anywhere in New Zealand Fast, efficient, unrivalled service to deliver you the right part, at the right price, on time, every time.

95% of road freight items are dispatched within 24 hours Order before 3pm weekdays for overnight delivery to main centres!

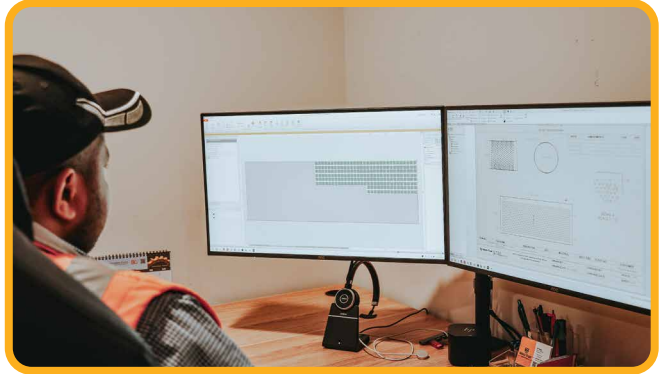

OUR CAPABILITIES & SERVICES

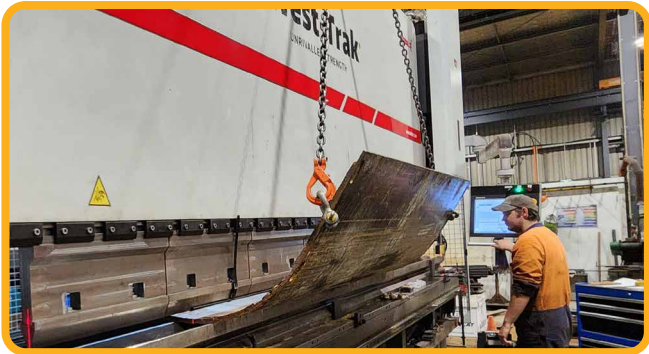

CNC Profile Cutting

We provide our customers with the fastest steel plate processing lead times in the industry! You'll get fast, reliable & solid service from our experienced plate processing expert.

Drawing & Design

Our team of experienced mechanical design engineers & CAD drawing experts use the latest software to design customised wear parts & structures to suit your needs. From custom bucket liners to Apron Feeder Assemblies, our team is experienced in all wear steel solutions.

Rolling & Pressing

Rely on our years of heavy engineering experience to supply the best brands & highest quality steel plate, rolled, bent, curved or pressed to your required shape. As direct importers, stockists & processors of wear steels, we can form the hard stuff for any application.

Track Group Bolt-Ups

Stay on Track for longer with less hassle, less downtime! We make it easy by supplying Track Groups with your choice of shoes already bolted on so you can roll off the old & roll on the new, to keep on tracking.

On-Site Wear Reporting

We'll help you stay on track & increase uptime of your machines by monitoring & measuring the performance of your Undercarriage system. Plus, we'll take care of bucket measure-ups to keep your operation running smoothly.

Welding & Fabrication

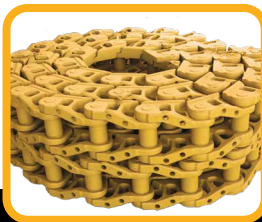

We weld the big stuff, the hard stuff & the toughest heat treated, through hardened wear steels. Our wear steel requires specialist welding methods to survive the roughest quarry, mining & forestry environments.

UNDERCARRIAGE PARTS

Excavator Undercarriage

We offer a large range of undercarriage parts including TUFF Superseal Chains for superior wear resistance, & track adjusters.

Dozer Undercarriage

High quality, sealed & lubricated (SALT) chains, & full undercarriage wear components are available for most makes & models of bulldozer up to CAT D11 / Komatsu D475 size.

Sprockets & Idlers

A large range of sprockets & idlers are available to suit most makes & models of excavators, dozers & other tracked machinery.

Track Rollers

A large range of rollers in single & double flange are available to suit most makes & models of excavators, dozers & other tracked machinery.

Grouser Relug Bar

A great way to increase your machine's traction is by re-lugging your old shoes, or enhancing your new ones.

Track Shoes

1, 2, & 3 bar options available for any application. Get more grip & stay safer on site with our track shoe range.

Final Drives

OEM quality final drives are available for a wide range of excavators & tracked equipment from 1-30 tonne.

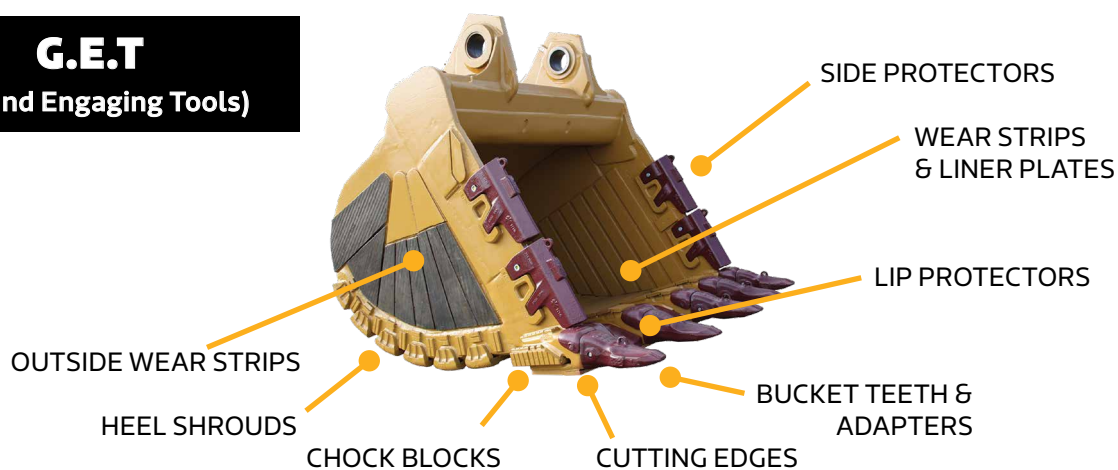

Excavator Track Guards

High quality track guards are available from stock to suit most makes & models of excavators from 10-50 tonne.

BUCKETS & G.E.T.

G.E.T

(Ground Engaging Tools)

20T+ Excavator Buckets

Bulk Buckets

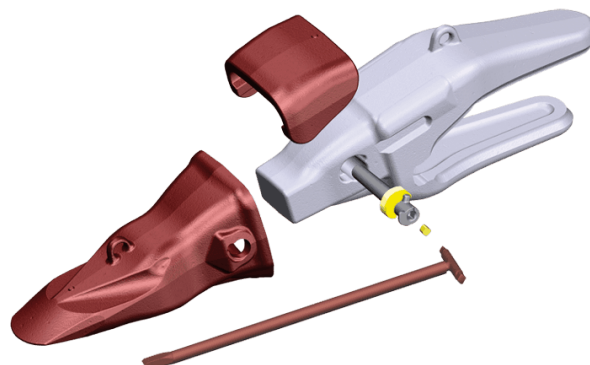

- Built for light, loose material like bark, sand, & topsoil.
- Lightweight design for speed & fuel efficiency.
- Maximises volume, not weight.

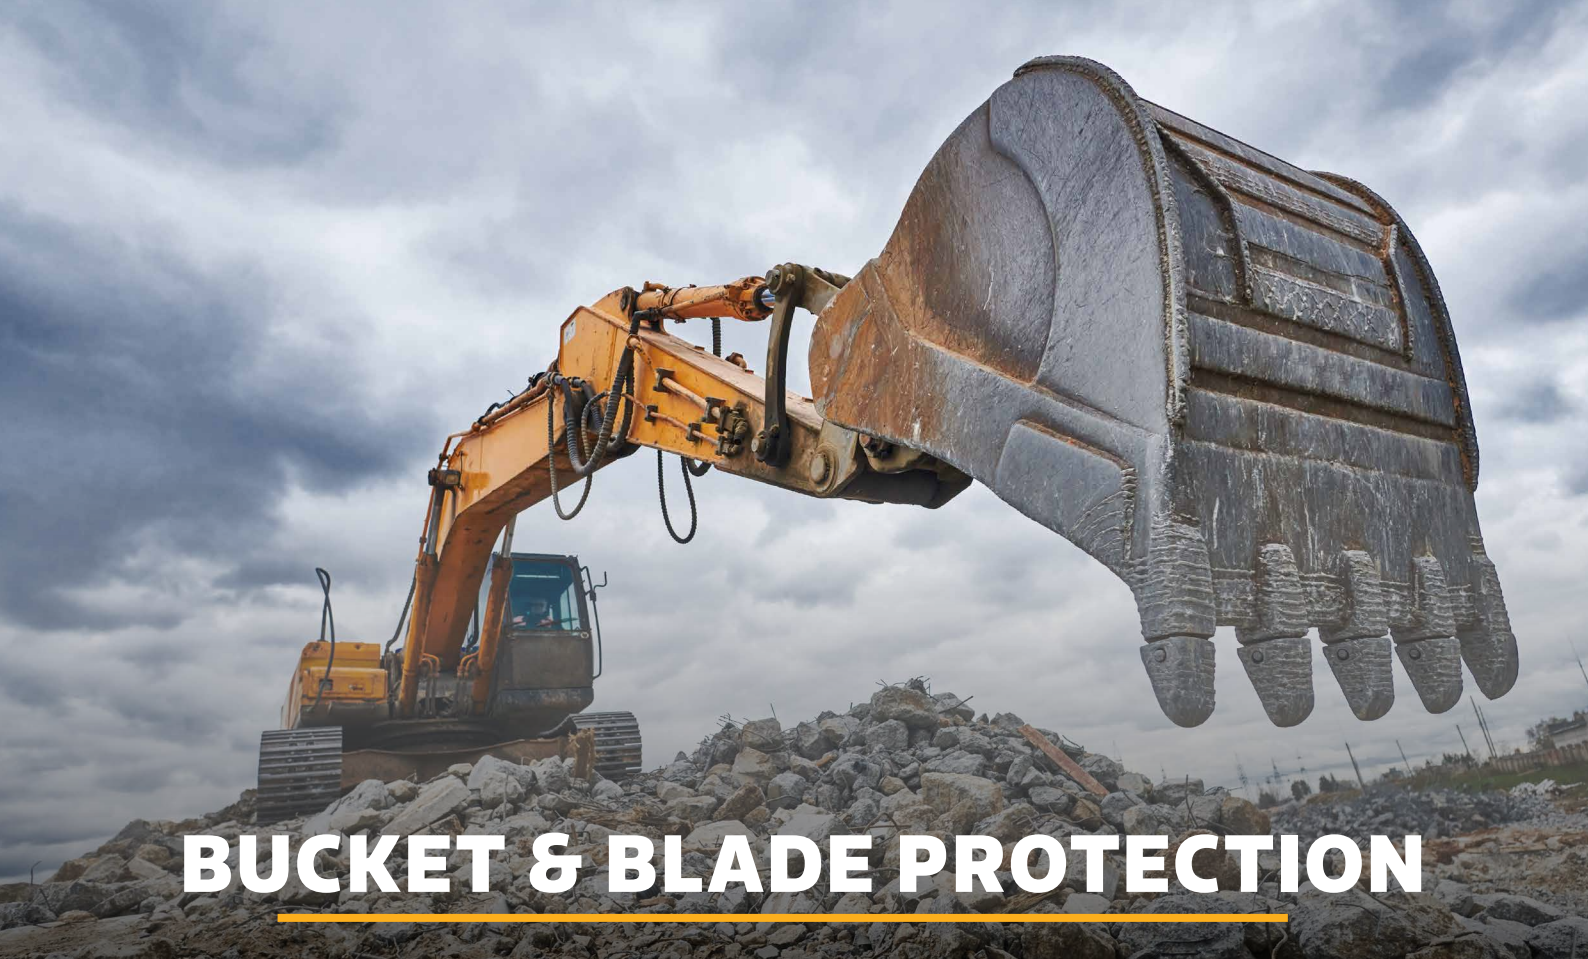

Rock Buckets

- Made for heavy, abrasive material like rock & gravel.
- Reinforced structure for durability in tough digs.
- Prioritises strength, not size.

MTG TEETH & ADAPTERS

The world's safest & most trusted system for your buckets; MTG Starmet. With guaranteed longer wear life & no loss of bucket teeth!

BUCKET & BLADE PROTECTION

WEAR STRIPS

HEEL SHROUDS

CHOCK BLOCK WEAR STRIPS

MTG PROMET LIP PROTECTORS

MTG PROMET SIDE PROTECTORS

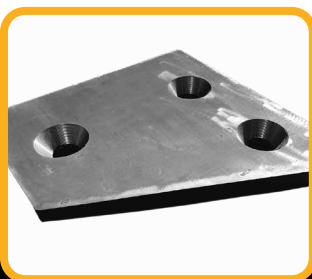

WELD-ON LIP PROTECTORS

G350, G450, G500, & G780 grades, available in a range of thickness

STEEL PLATE APPLICATIONS

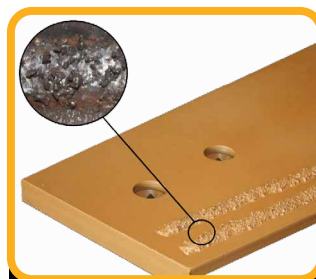

SHREDDER LINER PLATES

TROMMEL PARTS

BOLT ON LINING PLATES

A.R.M. HARDFACING

LINERS

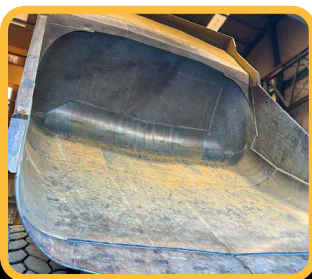

DOZER BLADES

EXCAVATOR BUCKETS

APRON FEEDERS

HAUL TRUCK TRAYS

LOADER BUCKETS

FIXED QUARRYING PLANT

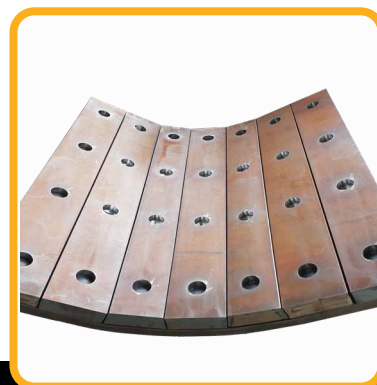

CRUSHER WEAR PARTS

CONE CRUSHERS

JAW CRUSHERS

IMPACT CRUSHERS

CUSTOM MADE CRUSHER PARTS

HAMMER MILLS

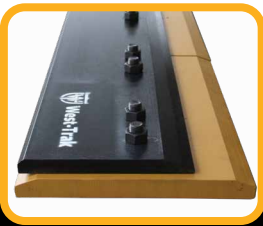

CHROMIUM CARBIDE LINERS

CHAMBER LINERS

CUTTING EDGES & END BITS

Cutting Edge Profiles

Single bevel, half arrow, & double bevel profile options are available to suit all types of buckets & blades.

Excavator Cutting Edges

Cut through the clutter, make your bucket dig easier & last longer with our bolt-on cutting edges.

Loader Cutting Edges & End Bits

Through-hardened to 500HB to ensure maximum performance in the most demanding environments.

Dozer Cutting Edges & End Bits

Available for all dozers up to CAT D11 / Komatsu D475 size, our dozer cutting edges are proven in NZ harshest conditions.

Scraper Cutting Edges & Routers

A full range of bolt-on, reversible cutting edges, routers & other wear parts are available for all makes & models of Scrapers & Scoops.

Compactor Cutting Edges & Wear Parts

A large range of high quality bolt-on cutting edges & end bits are available for all makes & models of Wheel Compactors & wheeled Dozers.

Grader Cutting Edges & End Bits

A full range of bolt-on cutting edges & end bits are available to suit most makes & models of Graders & Snow-plows.

Plow Bolts, Nuts & Washers

From 1/2" up to 1 3/8" size, our hardened plow bolts & nuts will keep your edges secure in all conditions.

FORESTRY TYRE TRACKS

Get a grip & pull more wood with a set of Veriga tyre tracks on your Skidders & Forwarders!

These Veriga tyre tracks will improve the productivity & performance of your machines in the most extreme working conditions.

**Single Wheel
Tyre Tracks**

**Bogie Wheel
Tyre Tracks**

Connecting Links & Tensioners

- The link design is an asymmetric shape with 30mm longitudinal length for long wear life.
- All links are made from quality boron steel & heat treated by a special oil quenching process for better through-hardness & toughness.

RUBBER TRACKS & PADS

Excavator Rubber Tracks

Our TerraTrack range is engineered for durability & optimised performance across a vast range of thousands of excavator models.

CTL Rubber Tracks

Delivering unmatched traction & durability, our range is optimised for NZ conditions with endless steel cabling & maximum traction.

MTL Rubber Tracks

Designed for optimal performance on multi terrain loaders, TerraTrack MTL tracks provide reliability even in the most demanding environments.

Camso Rubber Tracks

The OEM solution for both excavators & CTLs, Camso rubber tracks are crafted for ultimate reliability in the hardest conditions.

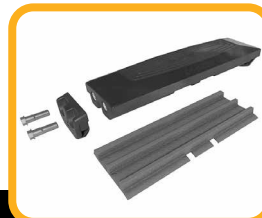

DuraLine Plus Rubber Pads

Made in Malaysia with an industry-leading warranty, these pads are best suited for harsh conditions like rail work where exceptional endurance is required.

Bolt-on Rubber Pads

An excellent solution for converting steel tracked machines to rubber pads for working on finished surfaces. Available in 400mm to 600mm widths.

Clip-on Rubber Pads

With a fixed bracket on one side & a clamp fitting on the other, this pad can quickly convert a steel tracked excavator to safely operate on fragile surfaces.

Road Liner Rubber Pads

Bolts directly on to the steel track chain. Ideal for machines from 4T to 26T for a wide variety of applications including rail infrastructure work.
