

# COMPANY OVERVIEW | 2025

Edition 6

# **WEST-TRAK**

**POWERED BY ASTRAK**

**Delivering the solutions you need to stay productive**

## INDUSTRIES WE SERVE

### MINING

Downtime costs. Our mining solutions ensure increased uptime & better performance from your front line machines.

### QUARRYING

High wear & tear environments can grind your machines to pieces. Our tough steel solutions provide longer service life & reduced downtime.

### FORESTRY

When you're miles away in the back blocks tracking, cutting & hauling logs, your machinery has to stay productive. Our range of forestry products & services will help you stick to the slopes & get more done.

### CIVIL CONSTRUCTION

When you're hard at work building infrastructure the economy relies on, we'll keep your machines moving with unrivalled parts, service & back-up support you can rely on.

### ENGINEERING

Breakdowns, maintenance or fabrication — our wear steels and processing capabilities keep your jobs on schedule and deliver uptime to a wide range of machinery.

## FAST FACTS

30+ Years

Industry Experience

Nationwide

Sales, Service & Support

1500+ Tonnes

Of Undercarriage Parts

500+ Tonnes

Of Ground Engaging Tools

10,000+ Machines

Supported in NZ

Global Support

From our parent company Astrak Global

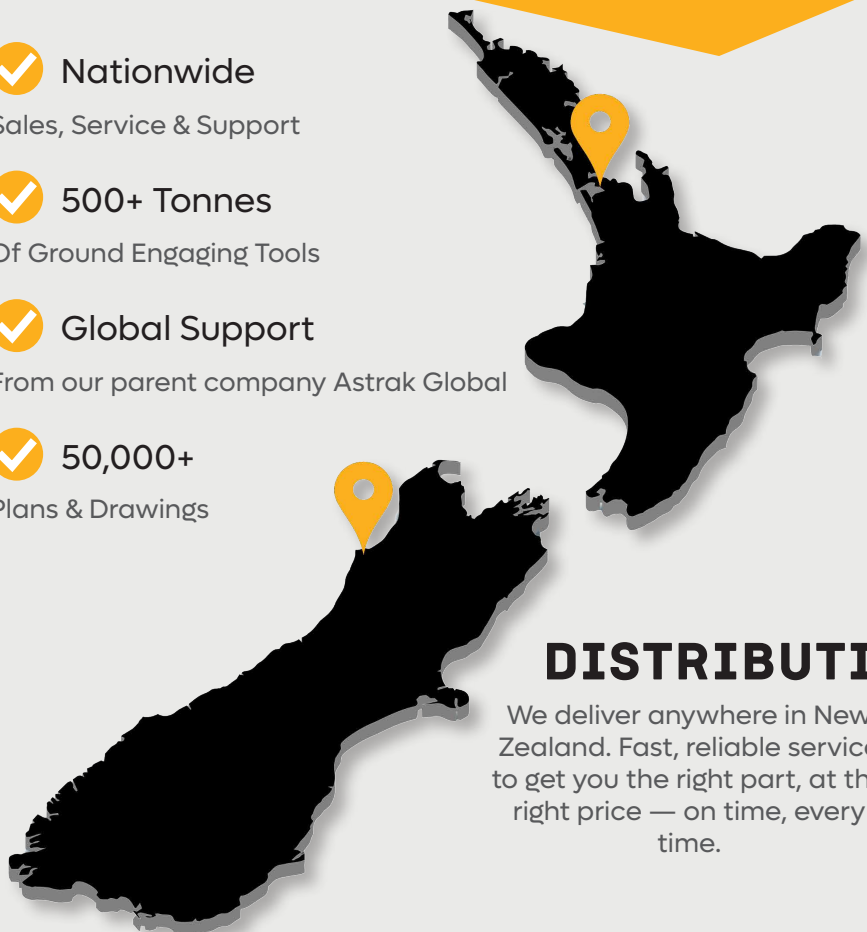

500+ Tonnes

Of Wear Plate & Profiles

50,000+

Plans & Drawings

## DISTRIBUTION

We deliver anywhere in New Zealand. Fast, reliable service to get you the right part, at the right price — on time, every time.

# OUR CAPABILITIES & SERVICES

## CNC Profile Cutting

Short lead times, accurate cuts, clean edges — handled by our in-house workshop team.

## Drawing & Design

Our team of experienced mechanical design engineers & CAD drawing experts use the latest software to design customised wear parts & structures to suit your needs. From custom bucket liners to Apron Feeder Assemblies, our team is experienced in all wear steel solutions.

## Rolling & Pressing

Rely on our years of heavy engineering experience to supply the best brands & highest quality steel plate, rolled, bent, curved or pressed to your required shape. As direct importers, stockists & processors of wear steels, we can form the hard stuff for any application.

## Track Group Bolt-Ups

Stay on Track for longer with less hassle, less downtime! We make it easy by supplying Track Groups with your choice of shoes already bolted on so you can roll off the old & roll on the new, to keep on tracking.

## On-Site Wear Reporting

We'll help you stay on track & increase uptime of your machines by monitoring & measuring the performance of your Undercarriage system. Plus, we'll take care of bucket measure-ups to keep your operation running smoothly.

## Welding & Fabrication

We weld the big stuff, the hard stuff & the toughest heat treated, through hardened wear steels. Our wear steel requires specialist welding methods to survive the roughest quarry, mining & forestry environments.

# UNDERCARRIAGE PARTS

**Excavator Undercarriage**

Full range including TUFF Superseal Chains, rollers, idlers, sprockets & adjusters — everything to keep you moving.

**Dozer Undercarriage**

SALT chains & full wear components including undercarriage, blades rippers & more are available for bulldozers up to CAT D11 / Komatsu D475.

**Sprockets & Idlers**

A large range of sprockets & idlers are available to suit most makes & models of excavators, dozers & other tracked machinery.

**Track Rollers**

Single & double flange for most makes & models of excavators, dozers & other tracked machinery.

**Grouser Relug Bar**

Extend shoe life & traction by re-lugging, a cost-effective solution for extreme environments.

**Track Shoes**

1, 2, & 3 bar options available for any application. Get more grip & stay safer on site with our track shoe range.

**Final Drives**

OEM quality final drives are available for a wide range of excavators & tracked equipment from 1-30 tonne.

**Excavator Track Guards**

High quality track guards are available from stock to suit most makes & models of excavators from 10-50 tonne.

# BUCKETS & G.E.T.

(Ground Engaging Tools)

From heavy-duty rock buckets to proven MTG teeth systems, we supply the toughest wear parts to dig harder and last longer in NZ's Mining, Quarrying, Civil Construction and Agricultural sectors.

## G.E.T

## 20T+ EXCAVATOR BUCKETS

### Bulk Buckets

Lighter & faster — designed for loose material like bark, sand & topsoil, bulk buckets maximise volume — so you shift more with less.

### Rock Buckets

Tough where it counts. Reinforced wear steel combats abrasive rock & gravel, these buckets prioritise strength and service life — so you can keep digging in any conditions.

## MTG TEETH & ADAPTERS

MTG's Veemet system is proven on the global stage & in NZ's Mining sector for reliable penetration and fewer changeouts.

# BUCKET & BLADE PROTECTION

WEAR STRIPS

HEEL SHROUDS

CHOCK BLOCK WEAR STRIPS

MTG PROMET SIDE PROTECTORS

MTG PROMET LIP PROTECTORS

WELD-ON LIP PROTECTORS

# STEEL PLATE APPLICATIONS

**G350, G450, G500, & G780 grades, available in a range of Thicknesses.**

From the quarry floor to haul trucks, our wear parts & customer steel solutions are built for any site — keeping your machinery productive & protected.

**SHREDDER LINER PLATES**

**TROMMEL PARTS**

**BOLT ON LINING PLATES**

**A.R.M. HARDFACING**

## LINERS

**DOZER BLADES**

**EXCAVATOR BUCKETS**

**APRON FEEDERS**

**HAUL TRUCK TRAYS**

**LOADER BUCKETS**

**QUARRYING WEAR PLANT**

# CRUSHER WEAR PARTS

From jaw crushers to cone, impact and hammer mills, our liners and wear parts are designed to handle the hardest rock and aggregate — lowering your cost per hour and reducing downtime.

**CONE CRUSHERS**

**JAW CRUSHERS**

**IMPACT CRUSHERS**

**HAMMER MILLS**

## CUSTOM MADE CRUSHER PARTS

**CHROMIUM CARBIDE LINERS**

**CHAMBER WEAR LINERS**

# CUTTING EDGES & END BITS

**Excavator Cutting Edges**

Cut through the clutter, make your bucket dig easier & last longer with our bolt-on cutting edges & end bits.

**Loader Cutting Edges & End Bits**

Through-hardened to 500HB to ensure maximum performance in the most demanding environments.

**Grader Cutting Edges & End Bits**

Bolt-on cutting edges & end bits are available to suit most makes & models of Graders & Snowplows.

**Dozer Cutting Edges & End Bits**

Available for all dozers up to CAT D11 / Komatsu D475 size, our dozer cutting edges are proven in NZ harshest conditions.

**Scraper Cutting Edges & Routers**

A full range of bolt-on, reversible cutting edges, routers & other wear parts are available for all makes & models of Scrapers & Scoops.

**Compactor Cutting Edges & Wear Parts**

A large range of high quality bolt-on cutting edges & end bits are available for all makes & models of Wheel Compactors & wheeled Dozers.

**Cutting Edge Profiles**

Single bevel, half arrow, & double bevel profile options are available to suit all types of buckets & blades.

**Plow Bolts, Nuts & Washers**

From 1/2" up to 1 3/8" size, our hardened plow bolts & nuts will keep your edges secure in all conditions.

# FORESTRY TYRE TRACKS

Increase pull and protection on skidders and forwarders.

Single-wheel and Bogie-wheel options available to improve the productivity & performance of your machines in the most extreme working conditions.

**Single Wheel  
Tyre Tracks**

**Bogie Wheel  
Tyre Tracks**

## Connecting Links & Tensioners

- The link design is an asymmetric shape with 30mm longitudinal length for long wear life.
- All links are made from quality boron steel & heat treated by a special oil quenching process for better through-hardness & toughness.

# RUBBER TRACKS & PADS

**Excavator Rubber Tracks**

Our TerraTrack range is engineered for durability & optimised performance across a vast range of thousands of excavator models.

**CTL Rubber Tracks**

Delivering unmatched traction & durability, our range is optimised for NZ conditions with endless steel cabling & maximum traction.

**Dumper Rubber Tracks**

Designed for optimal performance in a range of conditions, our TerraTrack dumper rubber tracks deliver unmatched reliability.

**Bolt-on Rubber Pads**

An excellent solution for converting steel tracked machines to rubber pads for working on finished surfaces. Available in 400mm to 600mm widths.

**Clip-on Rubber Pads**

With a fixed bracket on one side & a clamp fitting on the other, this pad can quickly convert a steel tracked excavator to safely operate on fragile surfaces.

**Road Liner Rubber Pads**

Bolts directly on to the steel track chain. Ideal for machines from 4T to 26T for a wide variety of applications including rail infrastructure work.

**Delivering the solutions  
you need to stay  
productive.**
